

Overview

The HD-BOB allows quick access to signals on DB9, DB15 and DB25 cables. The circuit board is RoHs compliant, lead free, and allows for .1 to 32VDC with 2.5 Amps of current flow on each pin. The size of the box is 6.2"x7"x1.75" with a temperature range of -10 to 80°C.

Related Products - Training

Our vehicle networking seminars provide a thorough understanding of the various automotive and heavy-duty vehicle networks and include plenty of hands-on time. Our instructors have many years of industry experience and keep up-to-date in their knowledge by actively participating and leading various SAE, ISO, and TMC standards committees.

Related Products - Protocol Adapters and Engineering Tools

DG has 20+ years of experience in products allowing engineers and technicians access to vehicle networks. Our flagship product, the Dearborn Protocol Adapter (DPA) is being used by engineers, technicians, soldiers, and Marines across the world! Our VSI-2534 and Gryphon product lines are also widely in use by automotive technicians and engineers world-wide!
